Education

George Mason University — B.S. Computer Science | May 2026
GPA: 3.67/4.00

Technical Skills

Languages: TypeScript, JavaScript, Java, Go, Python, C++, C#
Technologies: React, Node.js, Express, REST APIs, MySQL, MongoDB, Git
Development: Android Studio, Unreal Engine 5, Unity, Unit Testing, Agile/Scrum

Projects

DuelistKingdom — *Full-Stack Web Application*
React, TypeScript, Node.js, Express, MySQL

- Developed a full-stack application for tracking trading card game players, matches, decks, and statistics using React, TypeScript, Node.js, and Express.
- Designed a relational MySQL schema and implemented authentication, persistent user sessions, and external API integration.

Turn-Based Fighting Game — *Native Android*

- Developed a native Android turn-based fighting game with a custom animation system and gameplay logic.

NASA Robotics Competition — *Python, Gazebo, ROS*

- Collaborated with experienced software professionals to program NASA's R5 Valkyrie humanoid robot to complete autonomous tasks in a simulated environment.

Experience

Mason Game and Technology Academy — Lead Instructor | 2016–2024

- Led programming and game-development classes of 20+ students through hands-on software projects.
- Developed technical curriculum, programming exercises, and course materials.
- Trained and mentored new instructors and teaching assistants on technical course content.

Virginia Serious Game Institute — Instructor | 2017–2023

- Trained groups of 6–20+ teachers and professionals in application development using Unity.
- Developed technical curriculum, educational materials, and an interactive web platform.
- Presented technical demonstrations and educational software to prospective business partners.
